

Boscov's ABC's TO NEW MATTRESS SHOPPING & CARE

HOW TO SHOP FOR QUALITY BEDDING

According to the Better Sleep Council, the average person will spend 1/3 of their life in bed. Yet when it comes to shopping for a bed, most people don't know what to look for. Here are some basics to look for when buying a new mattress.

Comfort

Gone are the days when a mattress had to be hard-as-a-board to be good for you. A too-hard mattress may only succeed in putting your shoulders and hips to sleep. You'll sleep best when your bed helps you feel cradled in comfort, cozy and secure. Take time to lie down on the mattress in the store before purchase to be sure it meets your needs. Comfort issues are not covered in the warranty. Please select your bedding carefully. Bedding is not returnable.

Support

A good mattress and foundation will support your body at all points and keep your spine in the same shape as a person with good standing posture.

Durability

The quality of materials and how they're put together determine how long a mattress set will last. The best assurance of good performance over a good many years is to buy the highest quality sleep set you can afford. Shop for the best value, not the cheapest price.

Complete Set

Your mattress set is designed so a particular mattress and boxspring work together. Much like putting a new house on a foundation, a new mattress may not perform at the optimum comfort level without the matching boxspring unit. To ensure your level of comfort remains consistent, we recommend purchasing the entire set (mattress and boxspring) together.

WHAT TO EXPECT FROM YOUR BEDDING

Body Impressions vs. Sagging

Body impressions are a totally normal occurrence with today's bedding. Today's thicker mattresses are made with new luxurious upholstery layers that provide more conformity than ever. Just like breaking in a new pair of shoes, a set of bedding will start showing impressions following the contours of your body. Don't worry, these impressions are normal, and are signs that your mattress is conforming to your body. Boscov's wants your new bedding investment to last as long as possible and give you years of trouble free use. Following the mattress care instructions will help minimize these impressions and make sure that the mattress wears evenly. Although sagging is not a normal occurrence, it does happen occasionally. Exchanges will be authorized after the bedding has been inspected and found to be defective, as per the manufacturer's warranty.

Odor

Like most new products, your mattress will have a "new" odor. This will dissipate over time.

Law Labels

We recommend you do not remove the white law label or the mattress trade labels. These labels serve as a means of identification to establish your warranty rights.

Mattress Thickness and Boxspring Choices

Mattress thickness and boxspring height can vary depending on the new style or manufacturer (e.g. pillow-top mattress). To reduce the height, low profile boxsprings can be ordered, split boxsprings are available for queen size sets at a minimal upcharge. Extra-deep pocket sheets are available for thicker mattresses at Boscov's.

Model	Width (Approx.)	Length (Approx.)
Twin	39-in.	75-in.
Twin XL	39-in.	80-in.
Full	54-in.	75-in.
Queen	60-in.	80-in.
King	76-in.	80-in.
California King	72-in.	84-in.

HOW TO MAINTAIN YOUR NEW BEDDING

Handles

If your mattress has handles, do not use them to lift the weight of the mattress. The handles were designed and installed to help you position the mattress on the boxspring. The handles were not designed to lift or move the entire weight of the mattress. Pulling a handle out of the mattress is not covered under any manufacturer's warranty.

Frames, Rails and Center Supports

Use proper support. Your warranty requires a center support on Queen & King size beds. Today's beds are heavier and require a center support to provide the proper level of comfort. Manufacturer's require at least five slats with a center support leg attached to the center slat if you have a queen size or king size headboard and footboard using slats. Low profile frames and rails are available to lower your bed height.

Mattress Protectors

Protect your investment. Stains void your warranty. Use a Mattress Protector to keep your mattress clean.

Please note: Exchanges are not permitted on stained or damaged bedding.

Simple Rotation for Mattress

First turn the mattress from end to end, so your head is now where your feet were. Then sleep on your mattress for the recommended amount of time.

Recommended Rotation Schedule

To help minimize body impressions, please rotate your mattress every two weeks for the first three months; then once every two months thereafter.
